

The Pros And Cons Of Ownership

No matter how you rationalize aircraft ownership, if safety is one of your primary considerations, you could simply be trading one set of safety concerns for another. It works like this:

PROS

- Familiarity with aircraft (Zen-like oneness)
- Maintenance (Demanded)
- Quirks (You know them for your own airplane)

CONS

- Familiarity with aircraft (Zone-like complacency)
- Maintenance (Deferred)
- Quirks (Not knowing the quirks of different planes)
